

*B*uilt with the strength of steel
and the timeless beauty of wood.

UNLIMITED
POTENTIAL

In-house manufacturing and state of the art equipment and techniques allow us to provide an unlimited range of options to our clients. Whether you need a custom design to fit your property, or have extensive snow or wind load requirements, Castlebrook can help you achieve your ultimate dream structure.

Welcome

At Castlebrook Barns we understand that the safety and comfort of your horses is of the utmost importance. That is why our barns are crafted with the structural integrity of sturdy 3/16" steel columns and the timeless beauty of tongue and groove lumber. We proudly offer a lifetime structural guarantee on all of our barns because we are confident you will be satisfied with their quality, form and function. With years of building experience and a history of excellence, Castlebrook Barns is a company you can trust. Get ready to join an elite group of satisfied customers who have chosen to house their horses in a Castlebrook barn. We look forward to building you the barn of your dreams.

TRUSS SECTION 4:12 SLOPE

SELECT
DECK LUMBER:
A NATURAL
INSULATOR

All of our structures are crafted using the finest 2" X 6" kiln-dried, select deck T&G lumber available. It is not only strong, beautiful and easy to maintain, but it also acts as a natural insulator. That means Castlebrook's barns stay cooler in the heat of summer and warmer during the frigid winter than typical metal walled barns.

Raised Center Aisle

The Raised Center Aisle configuration is one of our most popular designs. Both single and double breezeway versions of the Raised Center Aisle provide excellent ventilation, optimal lighting and a safe, weather-protected shelter for your horses. The sloping 3:12 roof pitch combined with the 12' center breezeway create a distinctive roofline profile that can be modified to meet your design requirements and specifications.

② 2" SQ. x .005

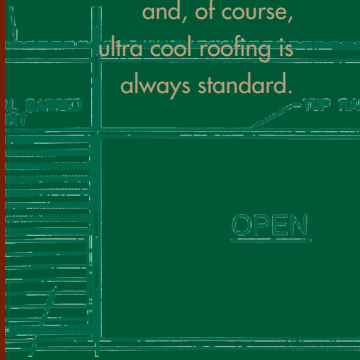

ROOFING

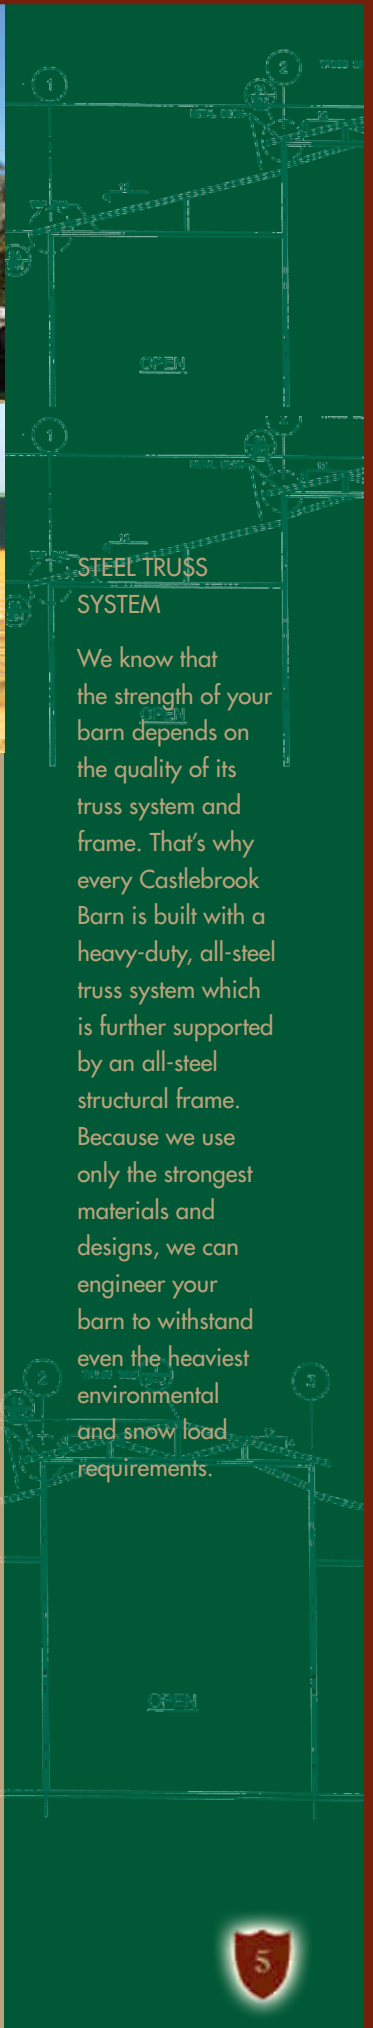

Our standard roofing is 26-gauge high tensile Castle-Tek Zincalume coated steel. The baked-on paint coatings are fabricated for years of non-fading, low maintenance beauty. The roof on your new Castlebrook Barn also carries a 40-year warranty, and, of course, ultra cool roofing is always standard.

Shedrow

Our Shedrow Barn is an excellent choice for warm weather climates and where space may be limited. It is popularly used as a training barn and in racetrack facilities. The Shedrow overhang offers sun and rain protection while creating a multi-purpose area which can be used for tacking up, cleaning equipment or storing hay. Depending on your site requirements, the Shedrow may be designed in a variety of configurations such as an "L" or "U" shape. The Shedrow may also be constructed in-line by eliminating the overhang entirely, or back-to-back utilizing a common rear wall.

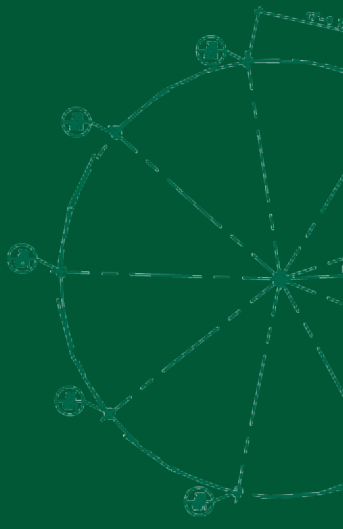

Gable

The Gable design has a classic, clean roofline with all the advantages of a breezeway configuration. A great choice for both warm and snowy climates, the Gable design is functional, economical and aesthetically pleasing.

Gambrel

Our Gambrel barn has the nostalgic beauty of barn designs from the past. This timeless style combines the modern technology of Castlebrook's modular construction with the traditional architecture of historical farms and ranches.

CHANNEL SYSTEM

We build our barns to be sturdy, safe, easy to assemble and low in maintenance. If you should ever need to replace one of the T&G lumber boards, the channel system allows for a quick and easy replacement. No field crew is needed, making the cost of maintenance very low. For the safety of your horses we use only radius channels with rounded edges.

Round Pens & Covered Round Pens

Castlebrook's Round Pens and Round Pen Covers are unsurpassed in the industry. All of our standard Round Pens come with an 8' wide gate and a dual squeeze trigger-latch for ease of operation. Each Round Pen section assembles quickly with a simple do-it-yourself pin system. Our Round Pen panels come in a variety of options such as solid 6' or 8' walls, barred walls or a combination of both. Our Round Pen Cover is designed to be an elegant and practical solution to sun, snow or rain. We offer both our Round Pens and Covered Round Pens in a variety of sizes and styles to meet your needs.

Custom Buildings

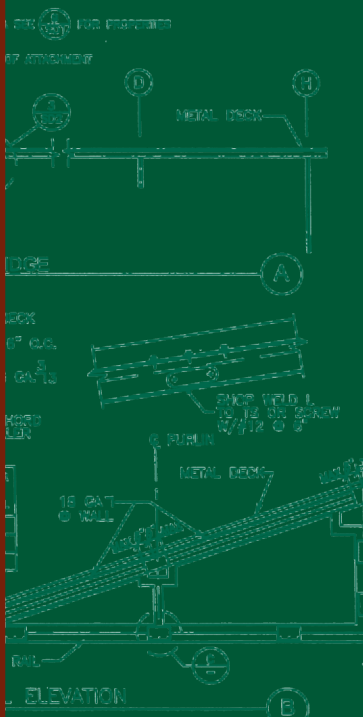

Whether you need an oversized stall, an entire equestrian facility or a home office, Castlebrook's design team can tailor a structure to meet your specifications. All Castlebrook structures are created using a modular system, allowing for countless configurations, including L-shaped and U-shaped structures and clearspan areas. All Castlebrook structures are engineered and built to meet or exceed building codes. We also offer custom detailing such as windows, doors, prep for tile roofs, custom flooring, skylights and more. Whatever your criteria, Castlebrook can configure a structure to satisfy all your requirements.

STRUCTURAL LONGEVITY

Structurally, our barns resist rust better and last longer than other barns due to a unique ventilation gap we have engineered into the design. We build our barns using a square tubular steel frame system leaving a 3/16" ventilation gap between the foundation and the bottom structural tube. For further circulation, a second gap is built in between the bottom tube and the lumber. These gaps prolong your barn's life by allowing moisture to evaporate quickly instead of being trapped, as it would be with a typical "U" shaped channel design.

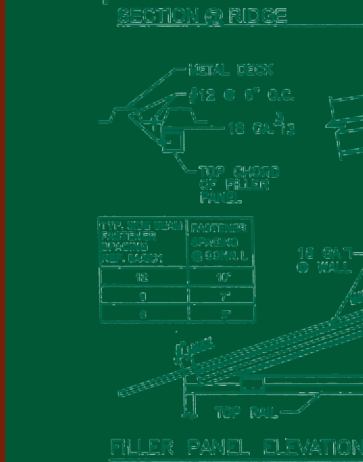

QUALITY WELDS

Attention to detail is first and foremost at Castlebrook Barns. Only quality welds are used on our structural framework. Our production team takes great pride in every barn that leaves our facility.

Equestrian Centers

Castlebrook's modular barn system is the perfect solution for creating an Equestrian Center. Our system includes all the components necessary for an exceptional facility, whether you're housing 20 or 200 horses.

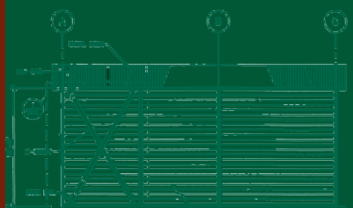

Arenas

Castlebrook offers a complete line of Arenas to meet your professional and personal needs. Castlebrook Arenas come in a variety of standard and customized sizes to accommodate your specific requirements and desires.

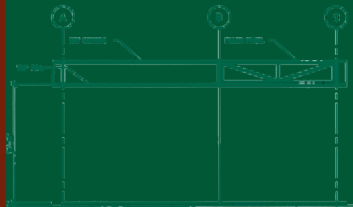

ENAMEL PAINT

We use industrial strength enamel paint to protect your Castlebrook structure from the elements. We offer this beautiful, durable finish in Castlebrook's hallmark colors of Brown and Green. If you are looking for something a little different or trying to match your barn to your house, custom colors are also available upon request.

*L*uxury Stalls, Stall Fronts & Dividers

Castlebrook is proud to offer our extensive line of Luxury Stalls, stall fronts and accessories. Our Luxury Stall options are hand crafted with care and value in every part to last a lifetime, yet are an affordable option to enhance your structure. Not only do these easily integrate into Castlebrook's standard framework, but they can also be designed to fit your custom or existing structures.

ATTENTION TO DETAIL

Details, details, details. They are the difference between ordinary and extraordinary. We are meticulous in the production and design of all our structures, using only the finest components and materials available. We invite you to compare and see the difference yourself.

Hardie Panel System

All Castlebrook structures have the option of a Hardie Panel exterior. These panels, with their stucco appearance, are available to aid with your architectural or H.O.A. requirements while still enjoying our beautiful select-deck T&G interiors. Hardie panels come pre-primed for ease of paint application and are fire resistant, as may be required in your area. In addition, Hardie panels are weather resistant and come with our standard 10-year kick-through warranty.

DURABLE TROLLEYS

Our trolley systems are sealed in Delron, a waterproof urethane used in the automotive and aerospace industries. Typical unsealed ball bearings use grease and are prone to rust as the grease washes away, exposing metal to metal. Our advanced Delron design prevents rust and is easy to clean effectively.
